## BULK PLANT Request for Gasoline Throughput Information

Registration and vapor control requirements for bulk gasoline plants are determined by a facility's annual throughput. We are, therefore, requesting gasoline throughput information so that we may determine your facility's regulatory status in accordance with Northwest Clean Air Agency (NWCAA) section 580.5 and 580.11. These regulations are available for review on the internet (<http://www.nwcleanair.org>).

Please return this form to the NWCAA no later than **March 1, 2008**. **Throughput information will be kept confidential**. If you have any questions regarding this request, please contact Julie O'Shaughnessy at extension 210.

Plant Information	
<b>Bulk Plant:</b>  <b>Location:</b>  <b>City:</b>  <b>Zip:</b>	<b>Contact:</b>  <b>Company:</b>  <b>Phone:</b>  <b>Fax:</b>
<i>Please update and/or complete information if necessary.</i>	

- A **bulk gasoline station** is defined as a facility that receives more than ninety percent of its annual gasoline throughput by transport tank, and reloads gasoline into transport tanks.
- Bulk gasoline plants operating with an annual gasoline throughput greater than 200,000 gallons are required to register with NWCAA and pay an annual registration fee.
- Bulk gasoline plants operating with an annual gasoline throughput greater than 2,000,000 gallons are required to employ vapor balance controls when transferring gasoline to and from transport tanks.

**Please provide annual gasoline throughput information (gallons) for the**

**2007 Calendar Year:**
