Gasoline Station Registration Exemption Request

Registration and vapor control requirements for Gasoline Stations are determined by a facility's annual throughput. At this time, we are requesting gasoline throughput information so that we may determine your facility's regulatory status in accordance with Northwest Clean Air Agency (NWCAA) section 320.5.1(dd), 580.1 and 580.6. These regulations are available for review on the internet (<http://www.nwcleanair.org>). Please return this form to the NWCAA no later than January 31. If you have any questions regarding this request, please contact Julie O'Shaughnessy at extension 210.

Station Address

Mailing Address

- A **Gasoline Station** is categorized by a facility's throughput from the previous calendar year. Throughput must be less than 200,000 gallons per year for a station to be exempt from registration.
- It will be assumed that facilities that do not submit this registration exemption form are operating over 200,000 gallons per year threshold. These facilities will be registered with the Northwest Clean Air Agency and billed an annual registration fee of one hundred ninety dollars (\$190).

Please complete the following information:

Annual gasoline throughput in gallons for calendar year 2007 _____.

I hereby certify that the above information is accurate and complete.
